Subject OSU Airport Jet Operations

Ernie - As per our discussion earlier, I have updated the table of 2003 operations previously sent to you to include ARC. Please look at the second worksheet in the file titled ARC.

I have sorted the table by ARC (BII, CI, and CII) and gave a total number of operations for each category. As you will see, I have been unable to find from the FAA's web site, the ARC for Lears, Challengers, and Saberliners. I have marked them "Data not available". Please provide me with this information if you have it. Despite not having the ARC for all aircraft types, we show 696 operations for the CII category, or that defined by the FAA as the ARC for the Gulfstream V, the airport's critical aircraft. I expect this number to be higher once we have the ARC for the remaining aircraft.

I will send to you next week our master plan, updated based aircraft list, and the ALP.

Please let me know if you have any questions regarding the attached file.

Thanks,

Doug
