Thanks Doug. We will incorporate these and any additional comments you have and bring the hard copies on 9/10.

Wes - Attached are my initial comments on the EA report. May have more as I continue my review.

Received the faxed letters.

Since you have the originals of all the pieces, can you put together hard copies of the report to be distributed at the Sept. 10 meeting? My guess would be 12 (enough to cover the Trustees, University Admin, etc., but not enough to pass out to the "guests.") Dean Baeslack, please comment if you think we should have more than that available.

No word yet from the FAA on the ALP.

Thanks,

Doug

Sure thing. I just faxed App B to you also. We're making a few tweaks like I mentioned. The more I thought about it, I liked your idea about including the operations forecast memo as an appendix, so we're planning to make that change.

Any thoughts on format for the noise report and additional copies of the EA (hard copy vs. electronic)? How many copies if you want hard copies?

What is the status of the ALP - has FAA given approval yet, or is it still in airspace review?

Wes

Wes - Thanks for sending the draft document. I have forwarded a copy of all material to the Dean of Engineering for his review. I have also begun a review of the document, and will provide initial comments to you tomorrow.

Thanks again,

Doug

Doug -

Here is the internal draft of the EA for your use. You will note that there are a couple of areas highlighted where we're looking for some direction from OSU - cost of the Preferred Alt and voluntary noise mitigation. There are also a few other tweaks that we will likely make before it goes to FAA, but those are minor, not substantive. Your comments are welcomed if you have any before this goes to FAA (on 9/13, right?). For the figures, please download these off our ftp site. The location is:

<ftp://dlzlansing@ftp.dlz.com/>

username is: dlzlansing

password is: dlzftp

There is a folder there called "OSU EA" where the figures are located.

Still waiting on the full noise report from Wyle which will be App A.

We can send the letters for App B if you want to see them, but I believe you have seen all of these previously.

You have also seen App C previously which is the stuff that went to OEPA.

We'll be working toward the Sept 7 package next, and I'll talk with you later in the week about the trip there on 9/9 and 9/10.

Feel free to call with questions.

Wes
