1. Suggest not doing this. It's an informal working meeting to help OSU prepare the best possible EA. OSU is already going above and beyond what is normally done for an EA by spoonfeeding the Advisory Committee, listening to their concerns over and over again, and sharing input data with them. A court reporter is overkill.
2. I say give them whatever time they need. The more we know about the changes they made to the INM inputs, the better we will be able to explain the sources we used.
3. Not sure what he's asking about here? They already got the internal draft EA, all the INM input files, and the PowerPoint presentations which summarize input information. There's not much more available, except for the noise report which is still being changed.

Re: City of Worthington / Ohio State University / Environmental Assessment Advisory Committee

Dear Christopher:

I have received a copy of the agenda for the 2:00 p.m. October 14, 2004 meeting of the Environmental Assessment Advisory Committee. I have the following comments / concerns:

1. We request that a Court Reporter be provided to make a record of the meeting.
2. OSU has only provided ten minutes for Comments and Feedback. The City of Worthington will have substantive comments and feedback that will require at least 30 minutes to present. Please provide additional time for these comments.
3. We have requested supporting documentation which is essential for a full and complete analysis of the EA by Freedom Of Information Act requests. That information has still not been provided. When can we expect it?

Thank you.

Sincerely,

/s/ David W. Zoll
