

STATEMENT OF SUPPORT

On behalf of the residents of our communities, and having read all relevant portions of the most current version of the Ohio State University Airport's Master Plan update, we the undersigned do hereby support and endorse the proposed extension of the north Runway 9L/27R at the University Airport. It is our belief that the development of Runway 9L/27R as the Airport's designated corporate runway will be a clear benefit to our communities and to many others in the surrounding area. In return for our support, we expect the University to commit to operating the Airport in a community-responsible manner, as outlined in Chapter 4.5 of the current Master Plan.

We thank Airport Director Doug Hammon for meeting with us regularly over the past two years. He has welcomed our comments throughout the latest Master Plan process, has addressed our questions and concerns, and has included many of our ideas in the plan document. We appreciate it, and look forward to continued good relations in the future.

This statement of support is by the authority vested in the undersigned, and by proper vote of the various councils, officers, trustees, boards, and/or associations.
